

Sableye

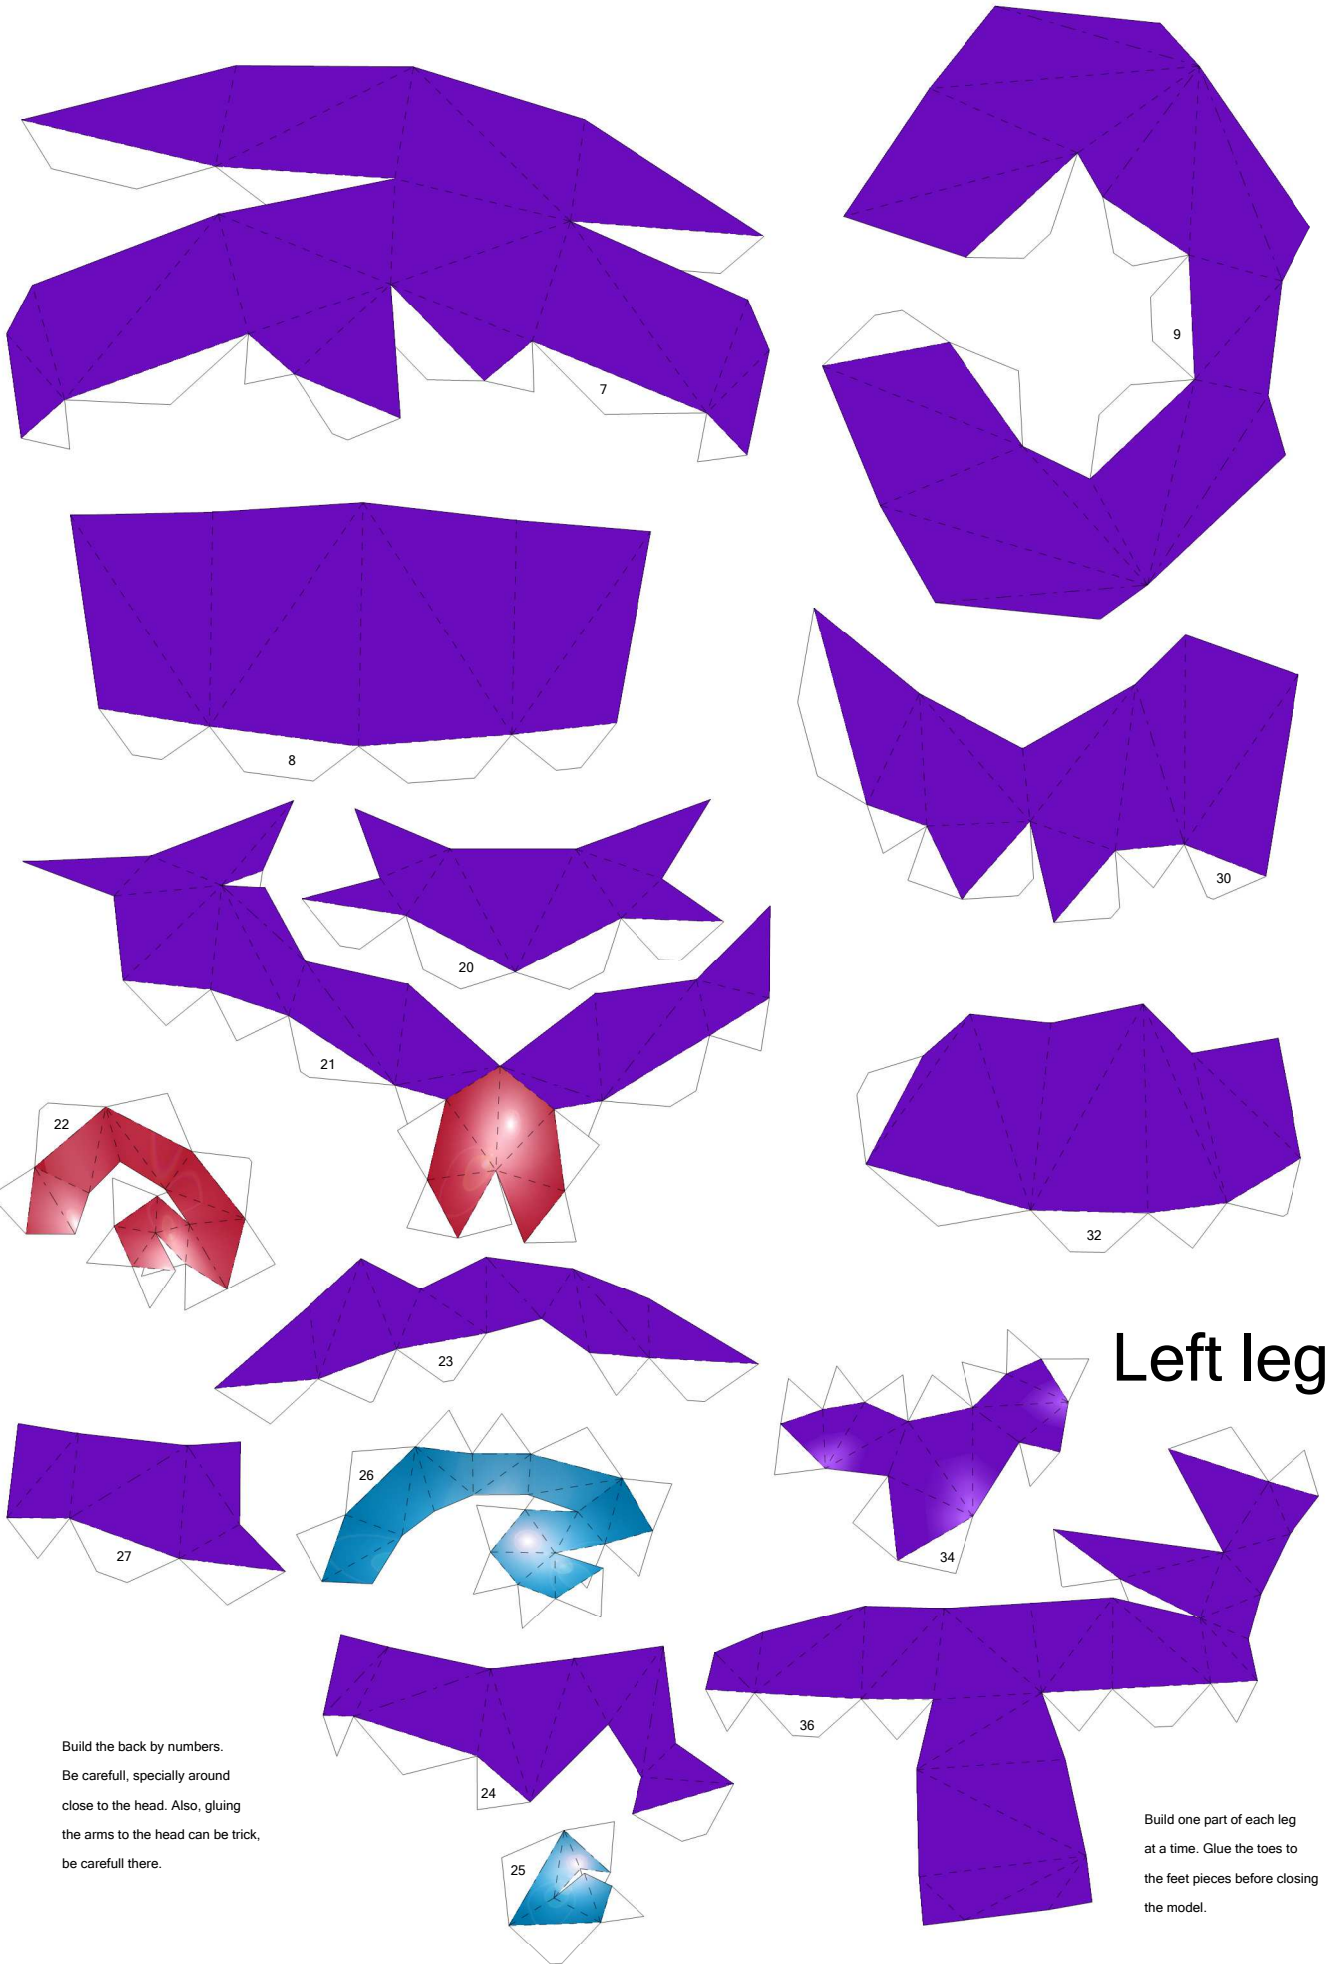

By PODragon

Build by LuIS

Paper Pokés
www.pokemonpapercraft.net

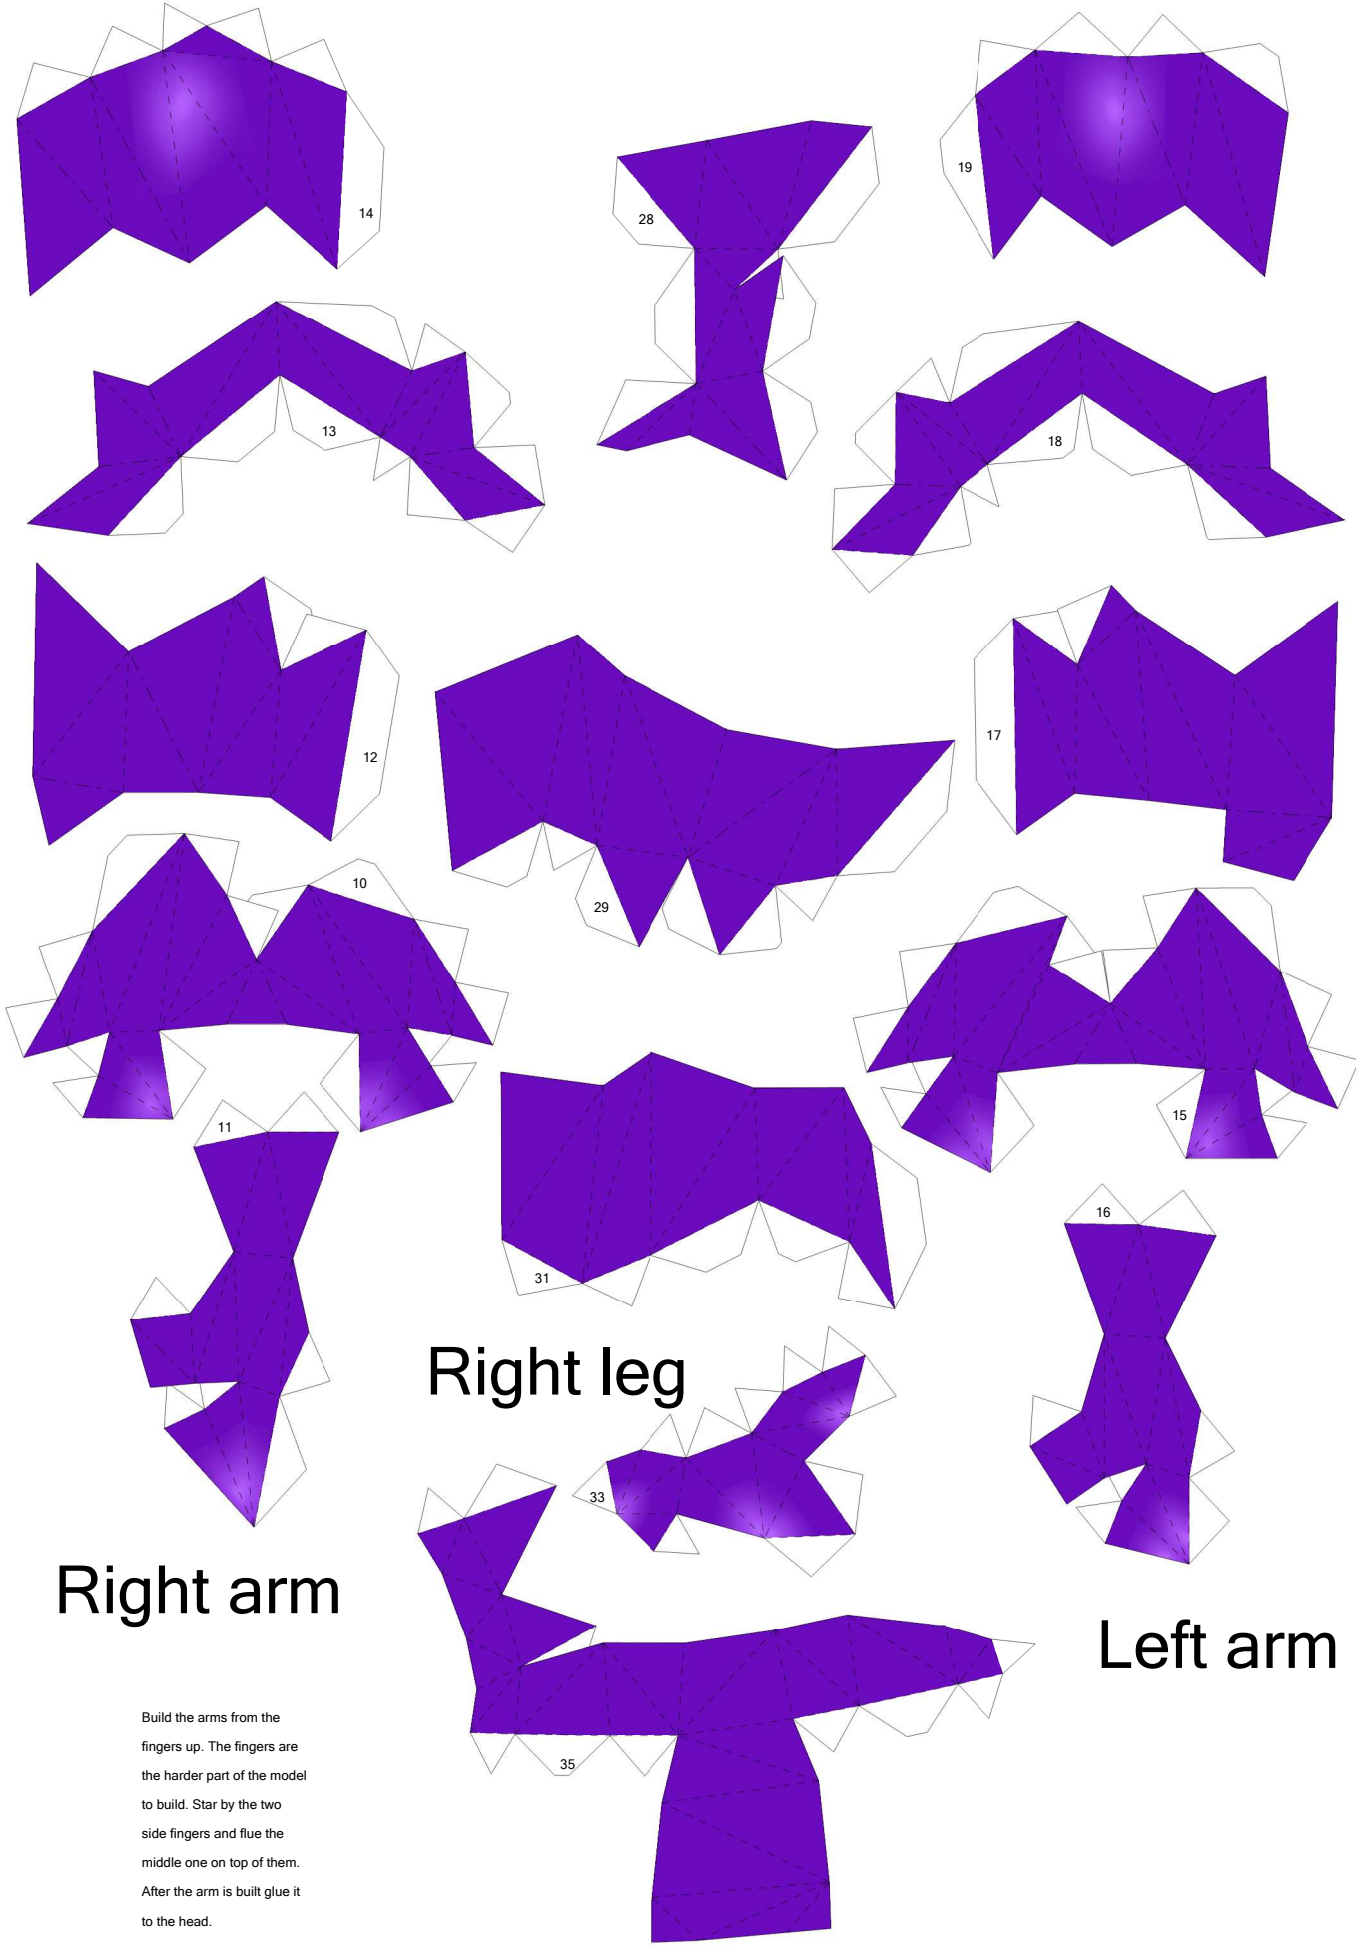

Start at the bigger head spike,
it can be tricky, glue each part
of the tab at a time. Build it around
itself after both the spikes are built.
Glue them to the head part as soon
as they are built.

Left leg

Build the back by numbers.
Be carefull, specially around
close to the head. Also, gluing
the arms to the head can be trick,
be carefull there.

Build one part of each leg
at a time. Glue the toes to
the feet pieces before closing
the model.

Right arm

Right leg

Left arm

Build the arms from the fingers up. The fingers are the harder part of the model to build. Start by the two side fingers and glue the middle one on top of them. After the arm is built glue it to the head.
