Start at the tip of the head.

Fold the horizontal lines in the mouth.

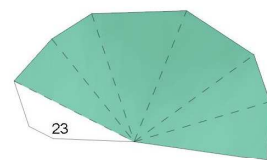

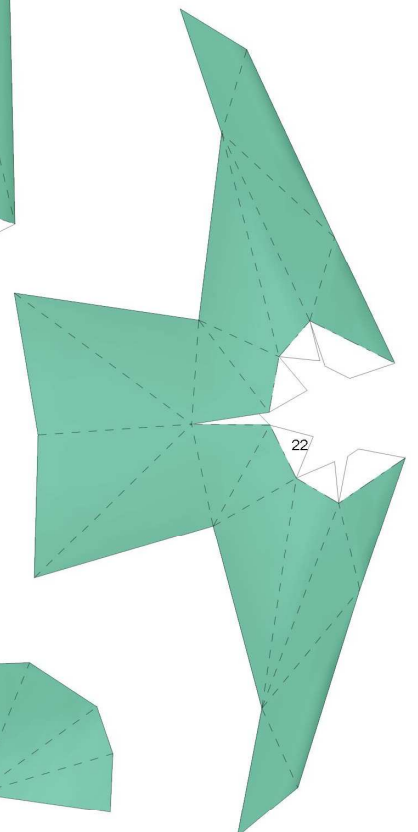

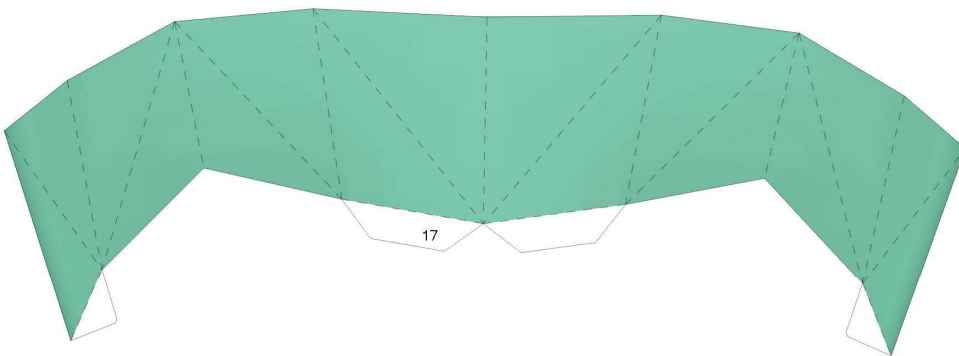

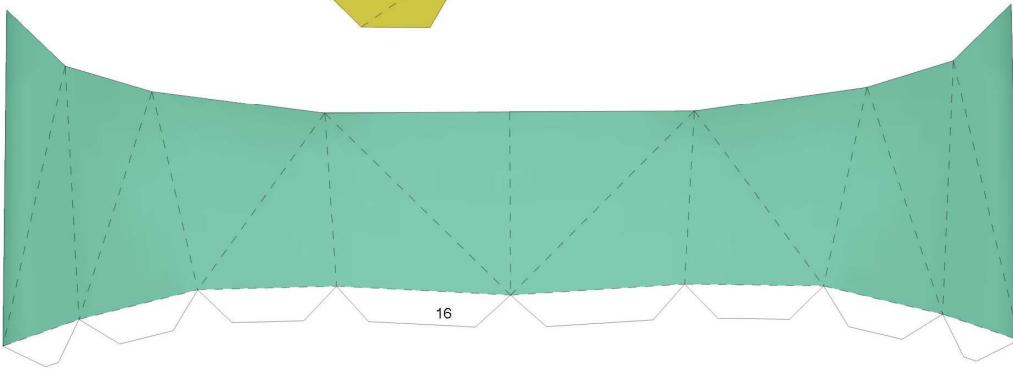

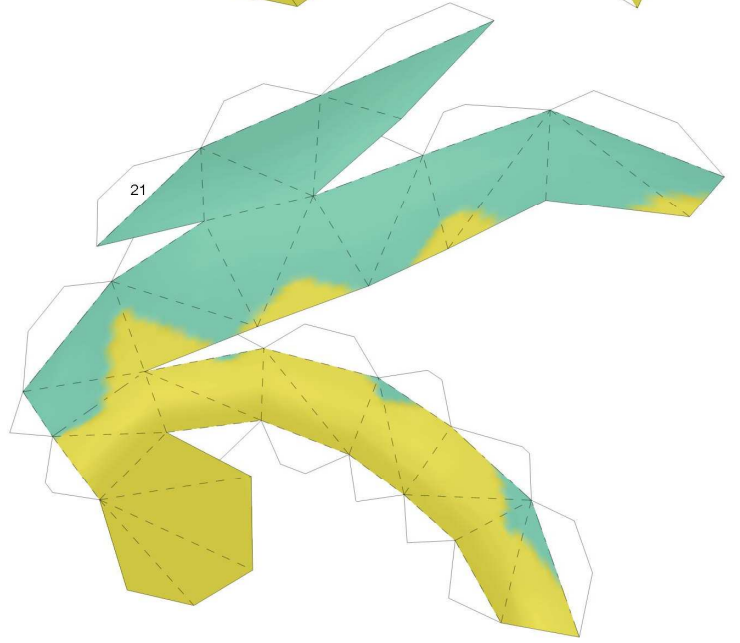

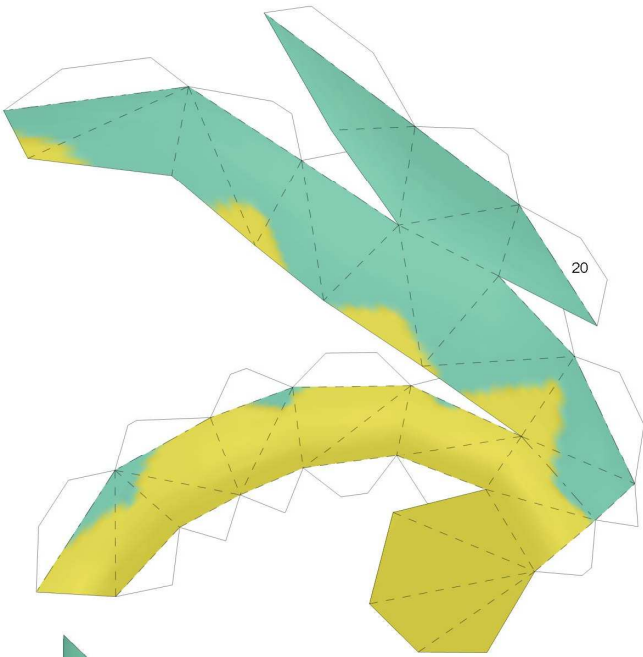

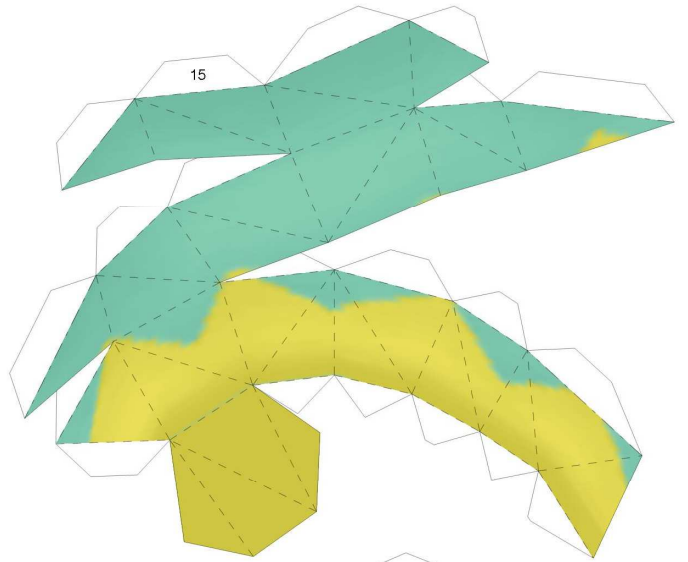

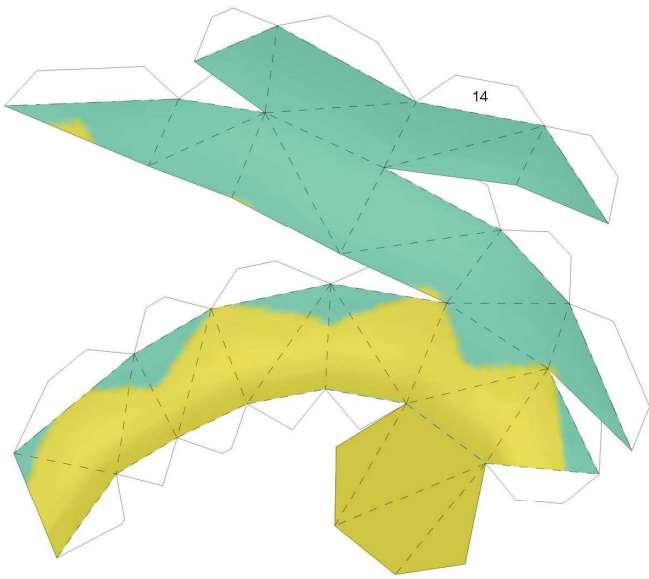

Glue the leaves only AFTER the entire model is built.

The area around the mouth can get tricky. Join pieces 7 and 8 together and only after join them with the mouth.

DON'T glue pieces 11 and 12 to themselves as soon as you glue them to the body. Do it as you glue the bottom of the body, closing them at the back right before gluing the last two pieces of the body.

Close at the tip of the tail
