

Zapdos

by Brandon

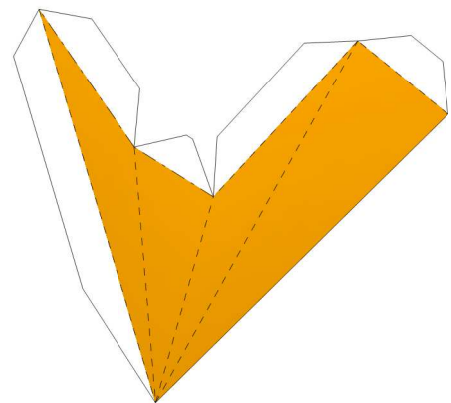

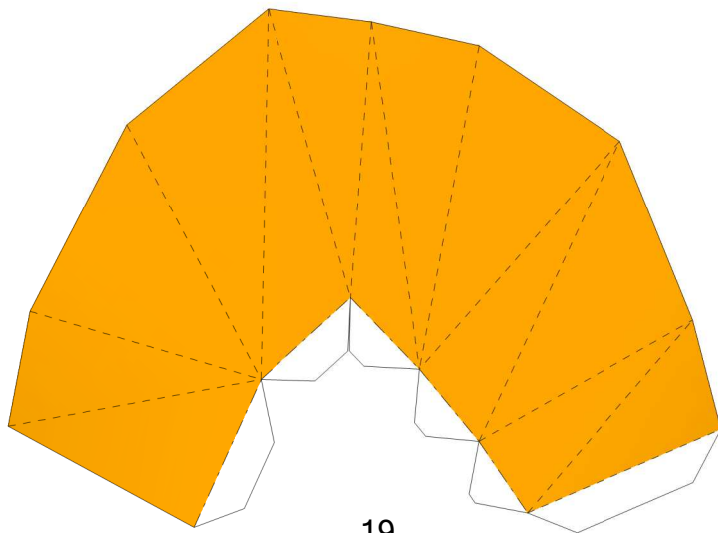

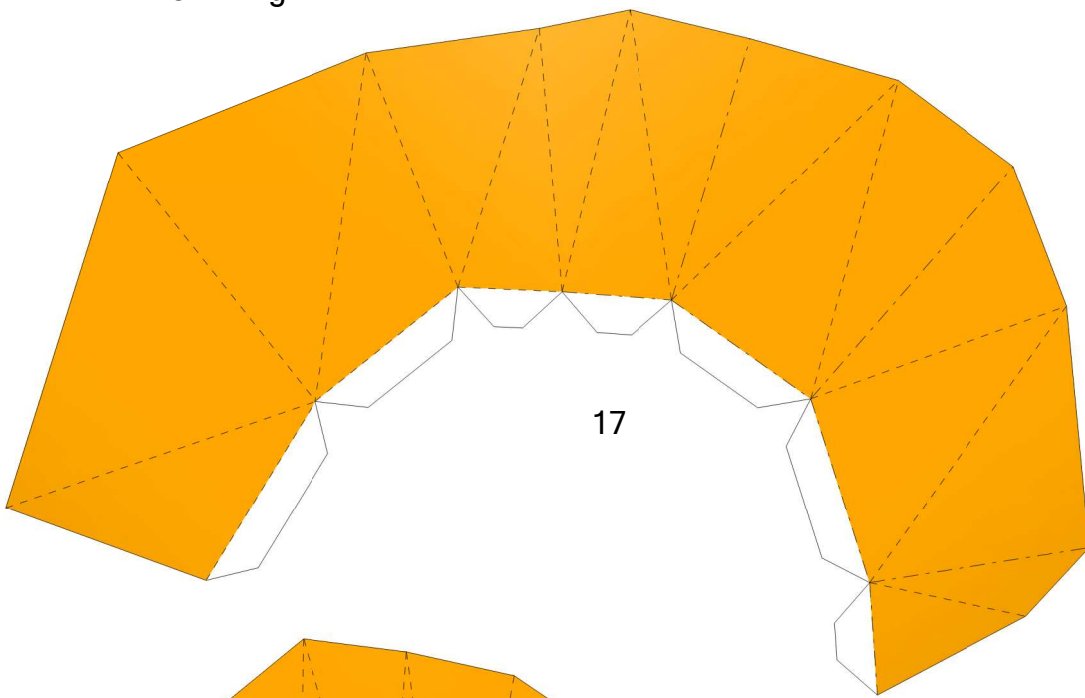

Build by Skeleman

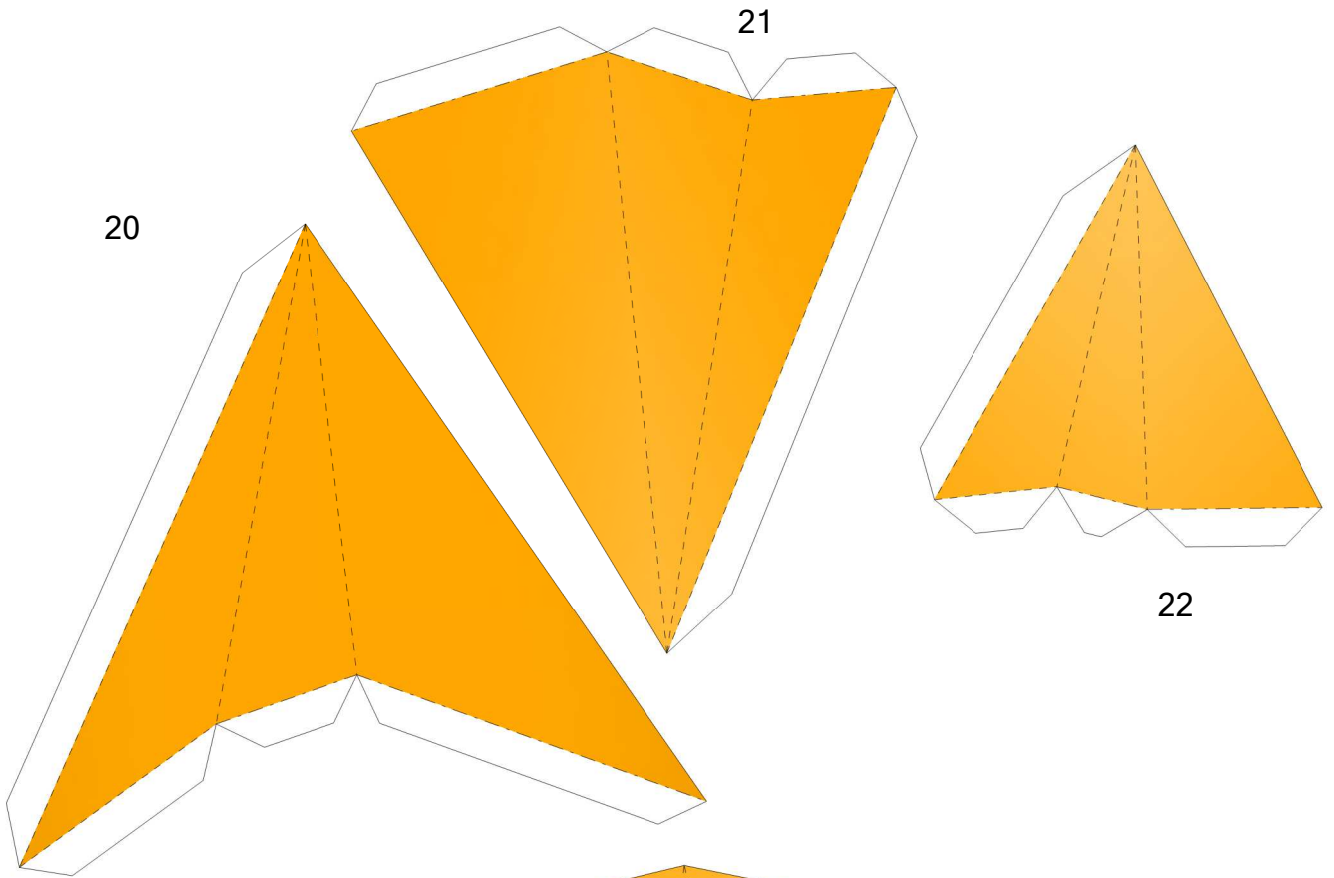

Left Wing

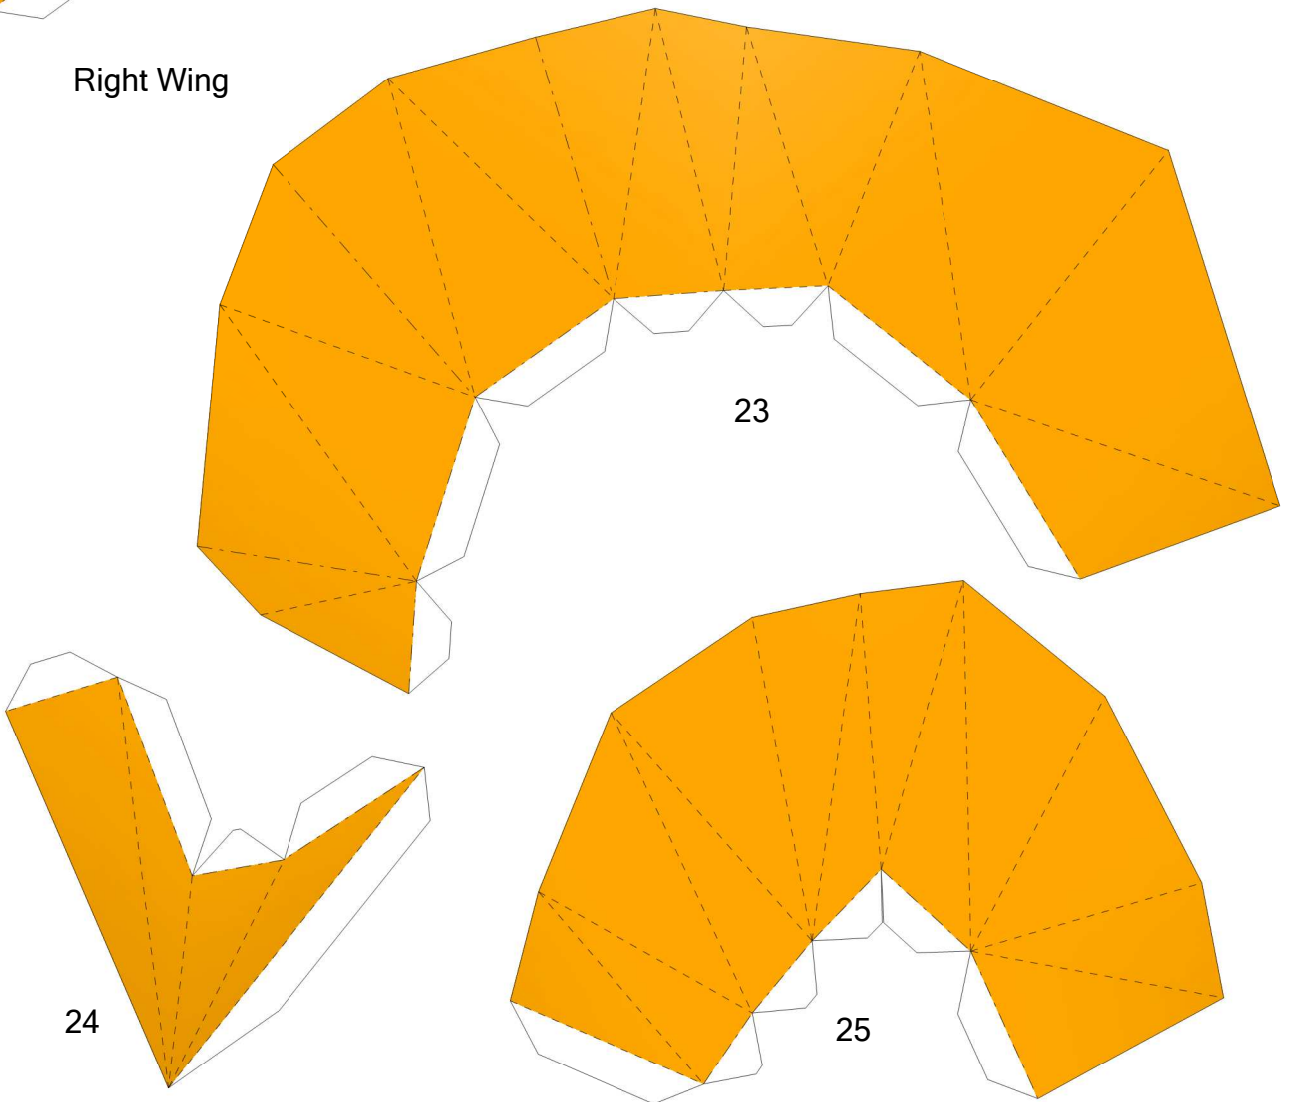

19

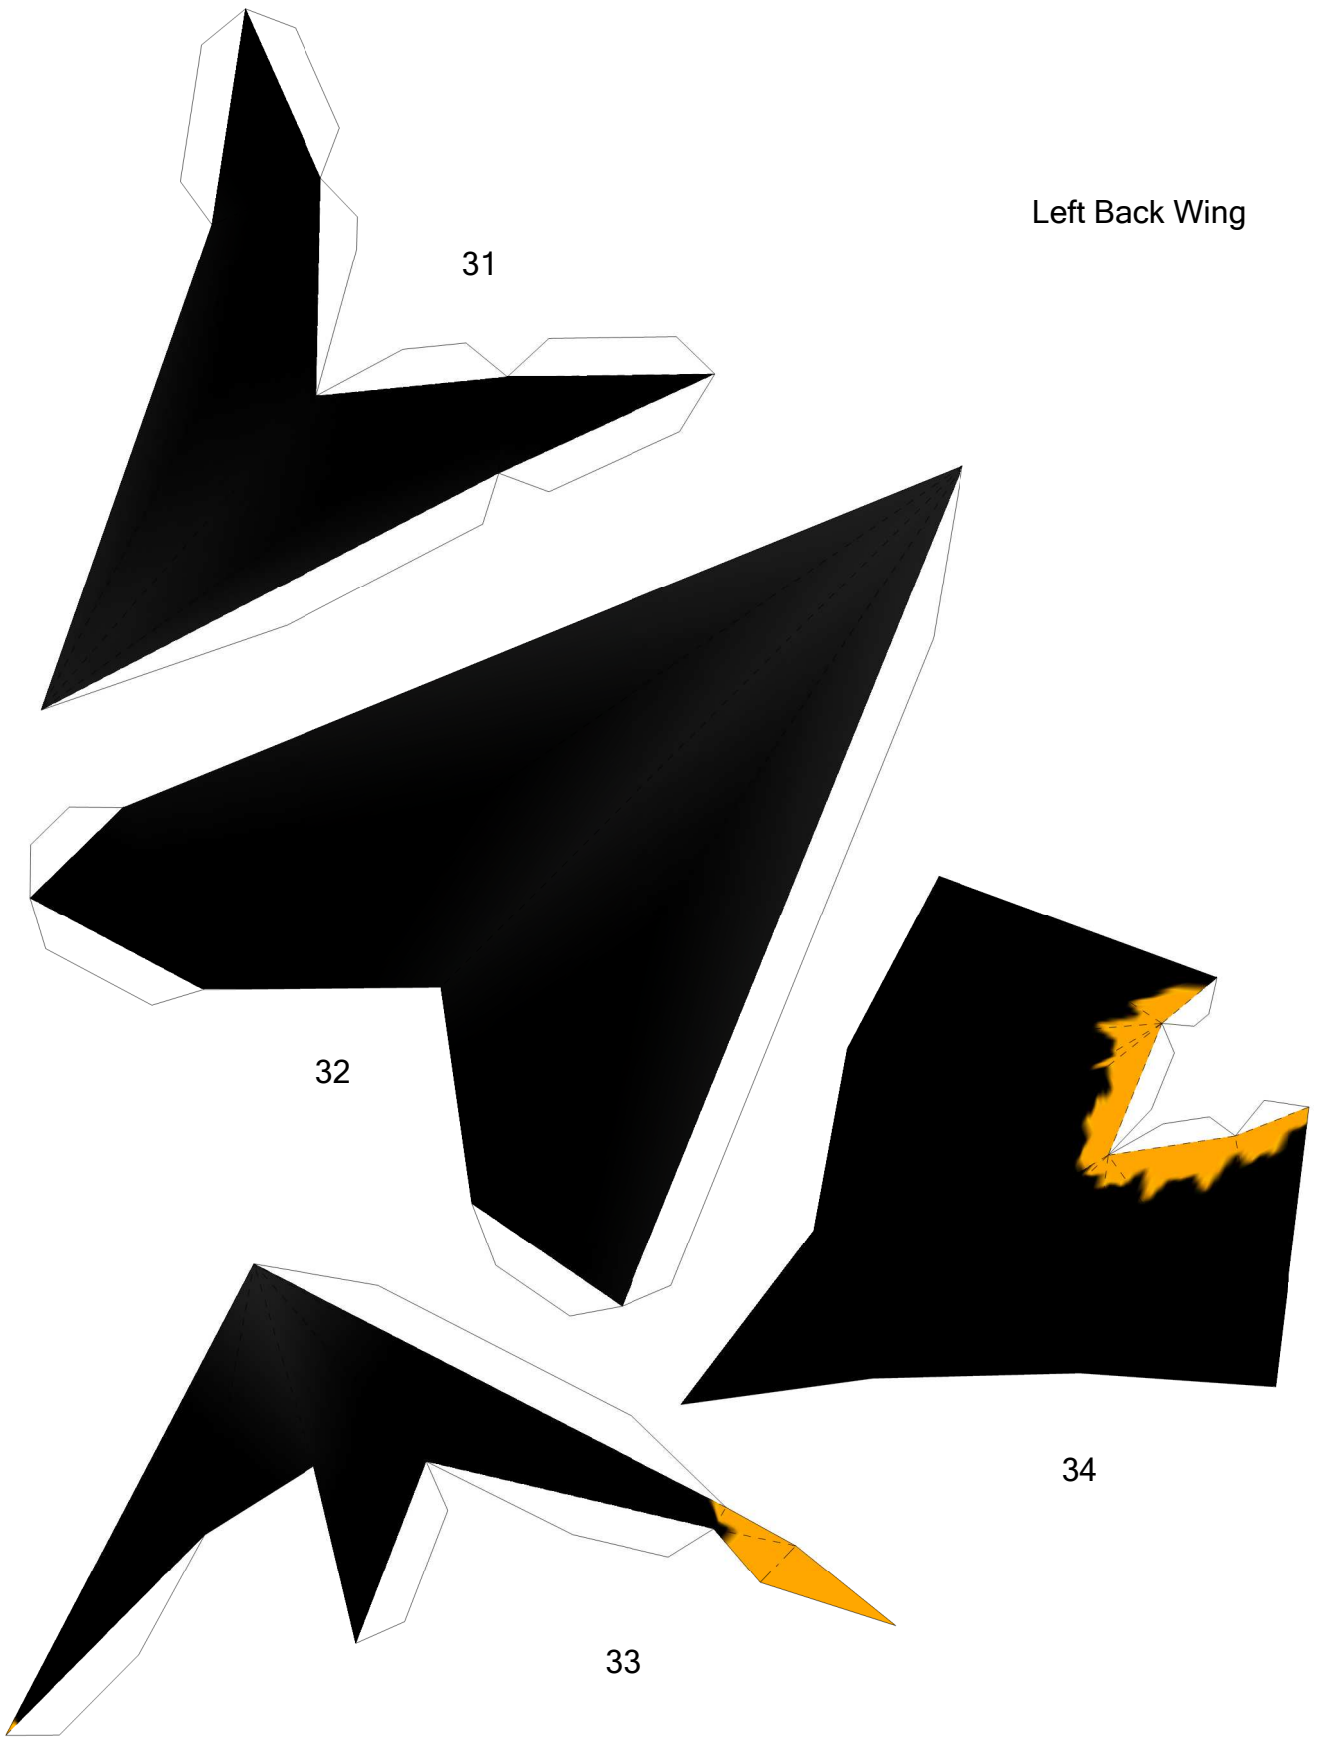

18

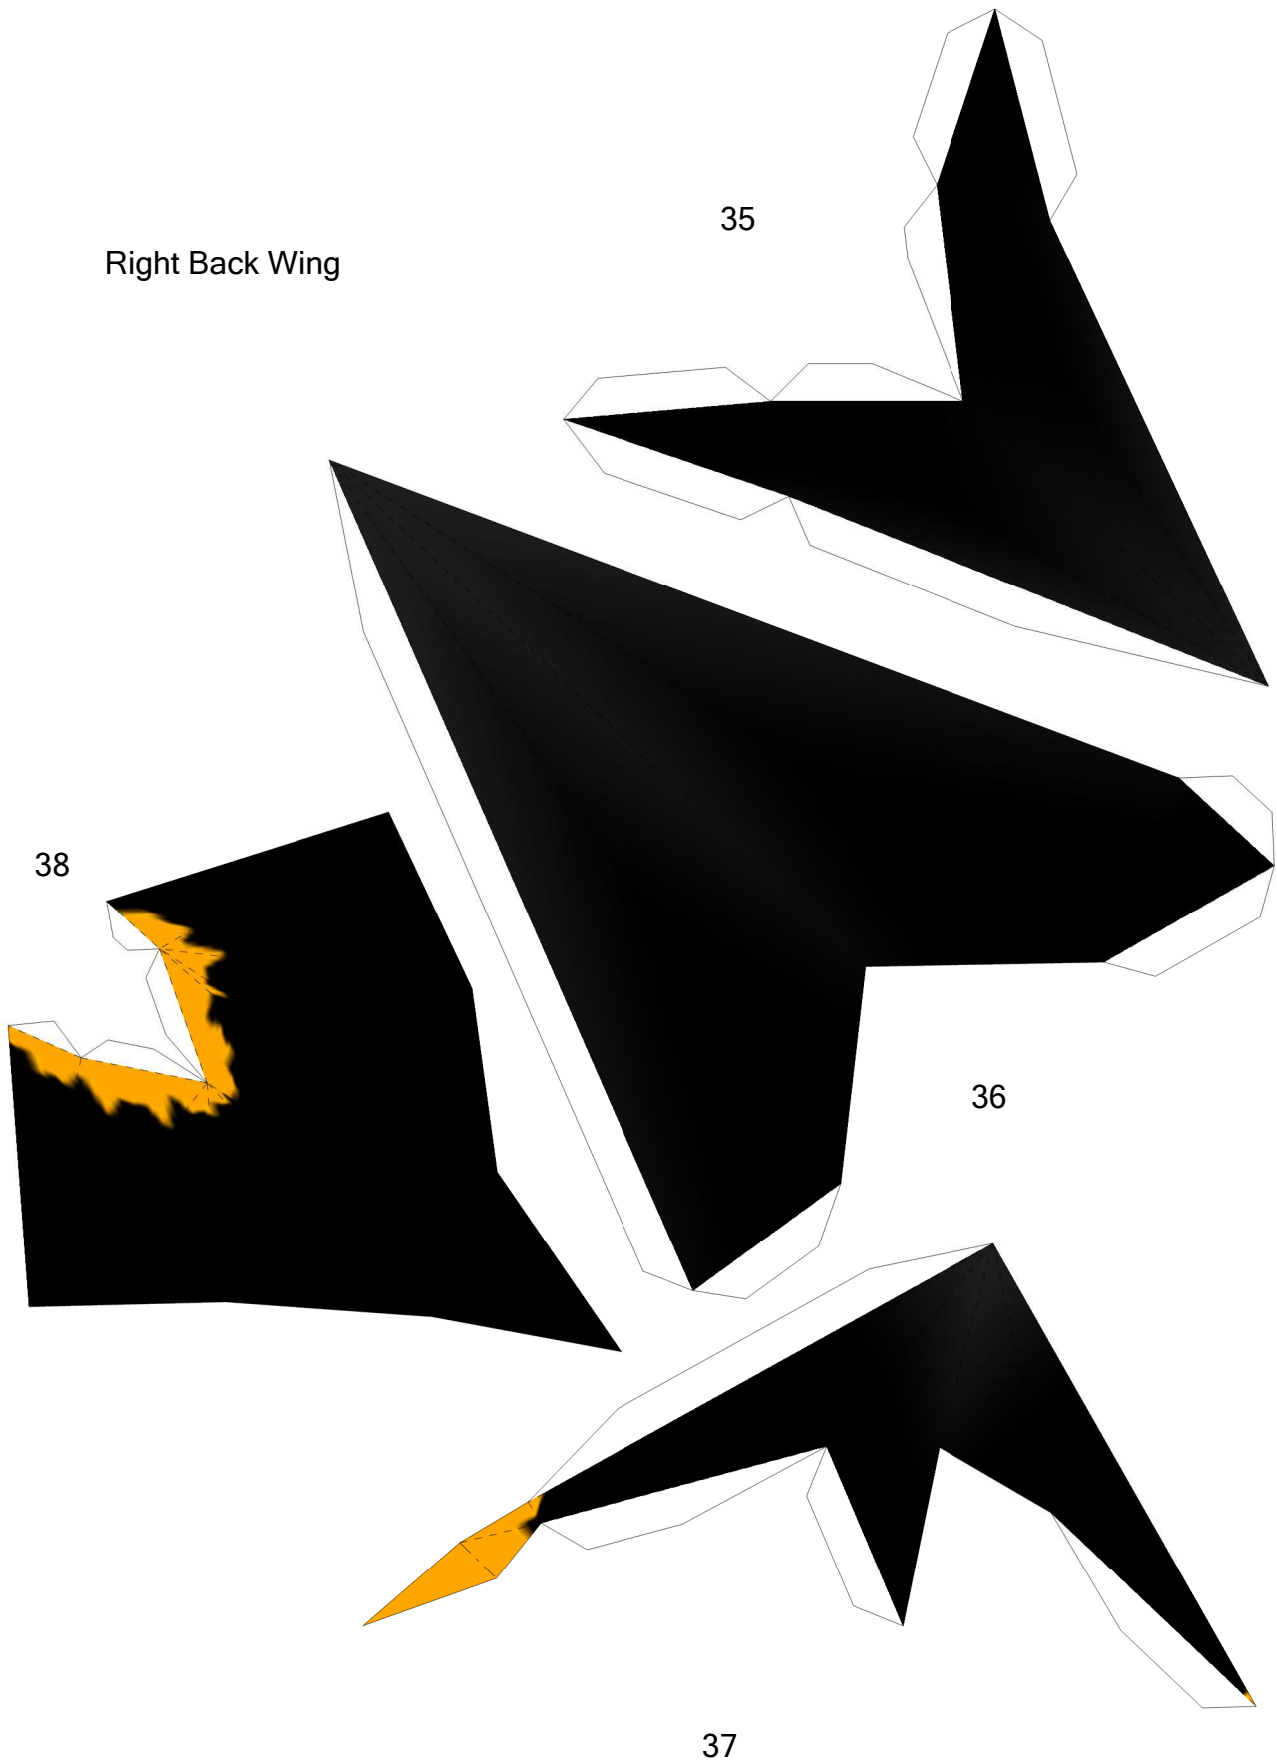

Right Wing

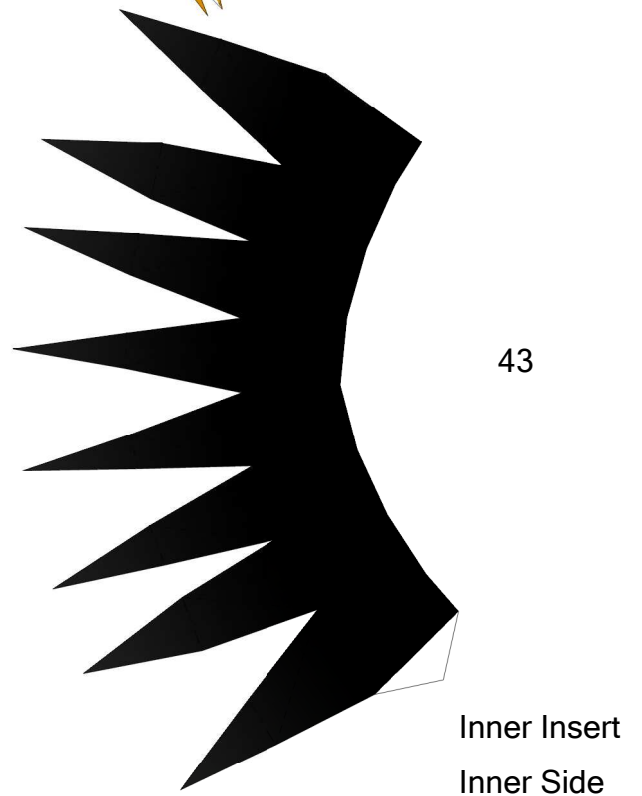

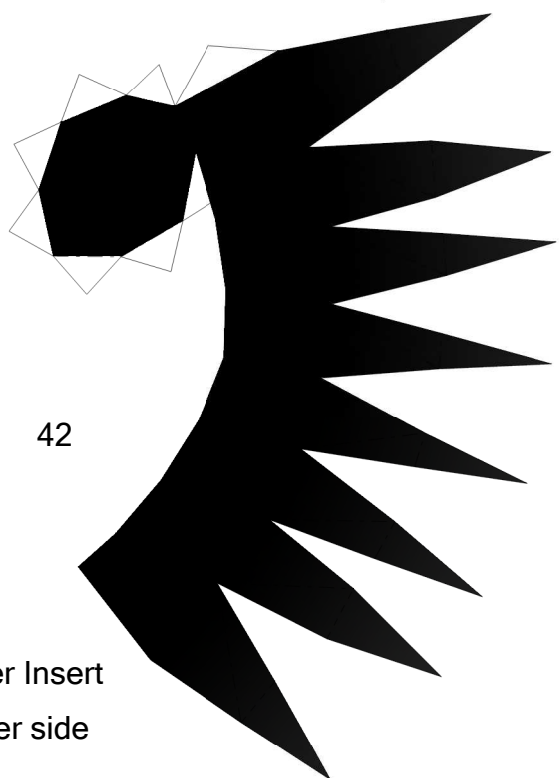

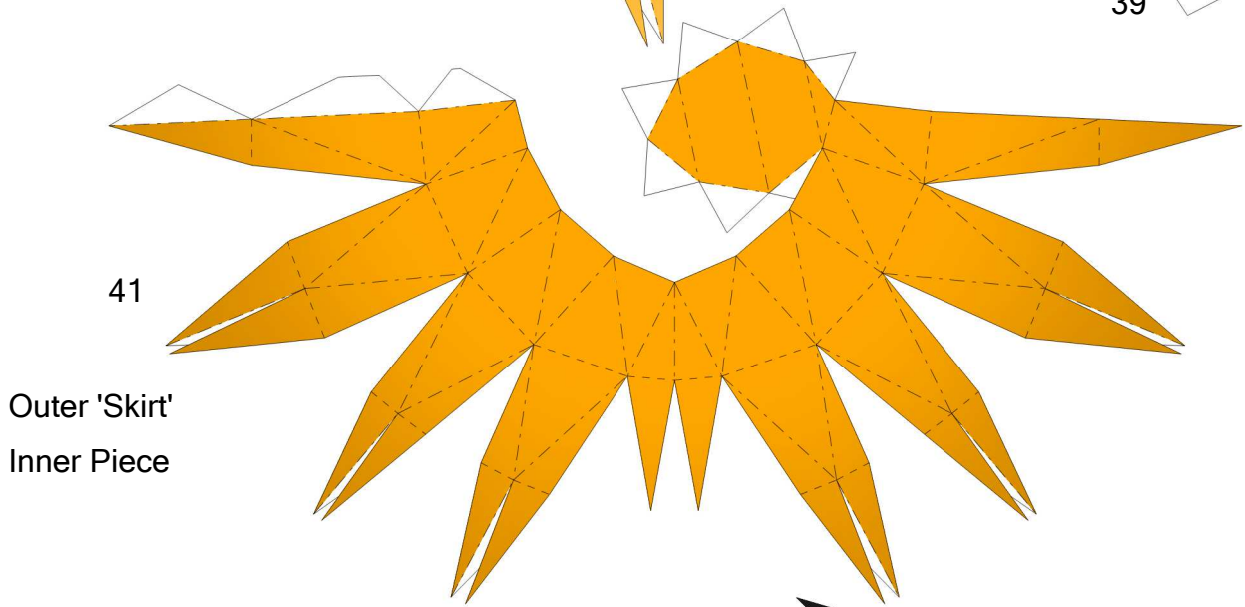

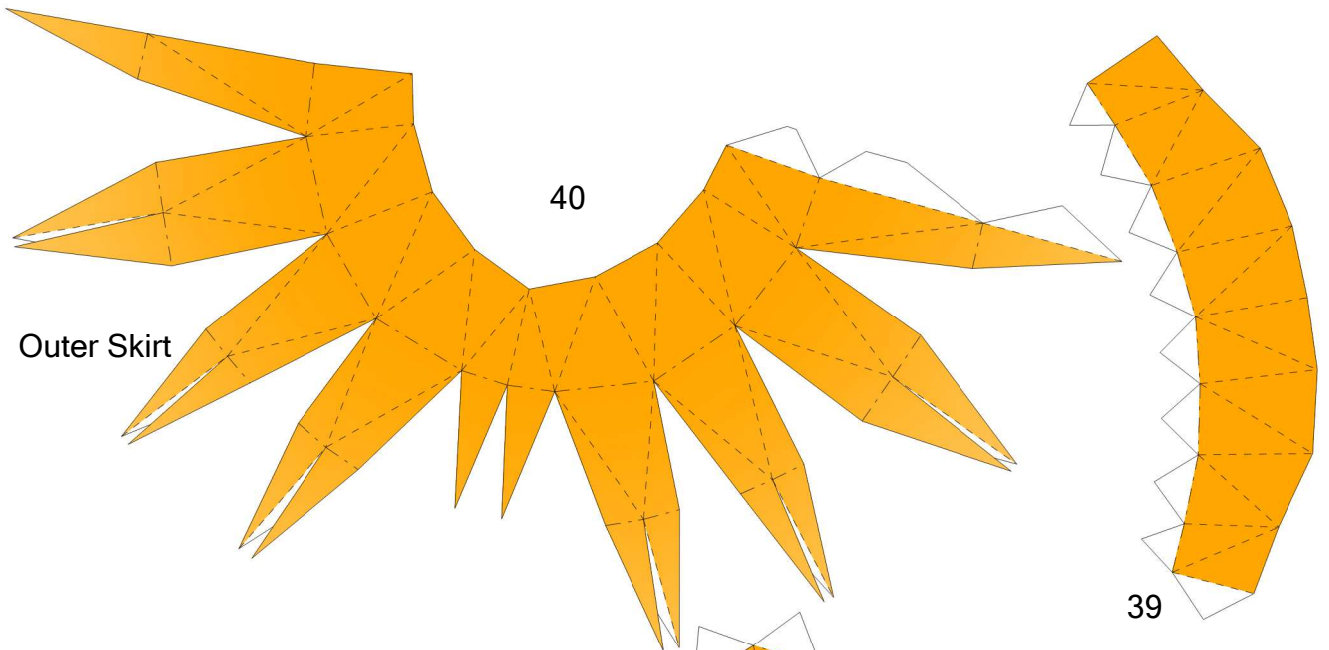

Left Back Wing

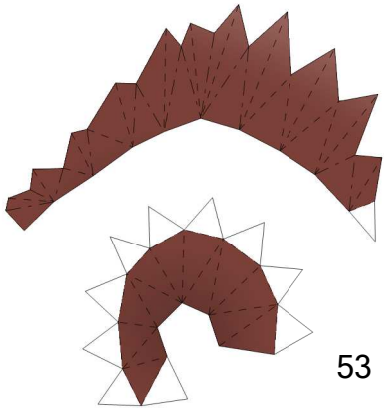

Right Back Wing

Glue the back wings onto the body
in the order indicated by the numbers

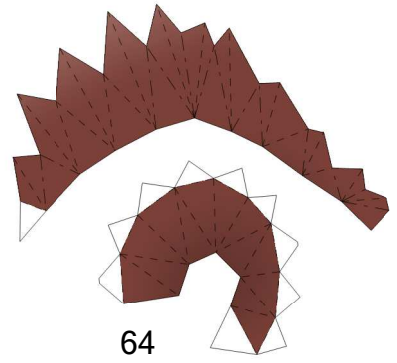

53

Left Leg

54

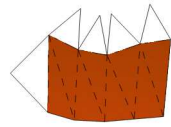

Build the toes first, attaching the rest of the foot moving towards the body. Once the brown parts are attached, be sure the yellow leg stubs (55-56, 44-45) are attached to the body, and then glue the brown parts over them.

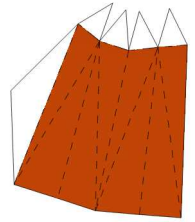

64

Right Leg

55

-Build the yellow cones- and attach to the body. Afterward, glue the orange and brown parts of the legs to the cones.

Base

68

Base simply rests on the flat inner face of the 'tail', where the black insert and yellow insert connect
